

Quality Assurance of Online Learning: Setting the scene – global and local

Gregor Kennedy
PVC, Teaching & Learning

What is/are the Quality Assurance Issue(s)?

What is Quality?

For Whom?

What is the “right” framework or approach?

Hands up ... if you think online learning in
post-secondary education has grown in the last 10 years?

PERCENTAGE OF STUDENTS TAKING DISTANCE COURSES - 2012-2016

STUDENTS TAKING DISTANCE COURSES BY LEVEL - 2012-2016

YEAR-TO-YEAR CHANGE IN DISTANCE ENROLLMENTS - DEGREE-GRANTING
INSTITUTIONS - 2012-2016

CONCENTRATION OF DISTANCE ENROLLMENTS AMONG THE TOP 5 PERCENT OF INSTITUTIONS

45% enrolments are in 5% of institutions

(I expect) **You were right!**

But also ...

- More undergraduate than graduate
- Relatively institutionally circumscribed
- Market share being lost by private-for-profits
- Distance is becoming (somewhat) mainstream

Is Australia the same ?

Part of the issue is that, in the context of more institutions, teachers and students “going online” – whether fully, partially – there is perhaps less clarity about what constitutes “high quality” online education.

While we are comfortable we “know quality” when it comes to “traditional” forms of education and modes of delivery, “we” are unsettled by this when it comes to online.

The Brief: ICDE

A desktop study of the world ...

“... establish an overview and analysis of the global situation with regard to existing relevant standards and guidelines for open, distance, flexible and online education including e-learning ...” [p.6]

There are a lot of frameworks

There are a lot of frameworks

INTERNATIONAL COUNCIL FOR OPEN AND DISTANCE EDUCATION

Quality models in online and open education around the globe: State of the art and recommendations

adopted within national Accreditation processes. There is no shortage of core resource for institutions or agencies seeking to formulate to Quality Assurance of Open, Online and Distance and education.

There are, understandably, more limited sources relating in the areas of OER and particularly MOOCs. Some of those that have been reviewed may be considered as derivatives or subsets of earlier systems applicable to open, distance and online education, extracting and modifying appropriate criteria from the spectrum of Management, Product and Service categories.

Table 1 Most Used Quality Model (From Table 1 in Ossiannilsson, Williams, Camilleri and Brown 2015). The name of the quality model is written in bold and italic then follows the governing organisation, first the abbreviation and then the full name spelled out in brackets. In case the organisation doesn't have a special model, the organisation is just written with the name.

| Quality Model | Certification | Benchmarking | Accreditation | Advisory Framework |
|--|---------------|--------------|---------------|--------------------|
| ACDSE (The African Council for Distance Education Quality Assurance and Accreditation Agency) | | | | |
| ACQ (The Australasian Council of Open Distance and e-Learning) | | | | |
| AVU (African Virtual University) | | | | |
| CALE (The Latin American and Caribbean Institute for Quality in Distance Education) | | | | |
| CHES (The Council for Higher Education Accreditation), US | | | | |
| E-xcellence (The European Association of Distance Teaching Universities), NL | | | | |
| OpenEd (The European Association of Distance Teaching Universities), NL | | | | |
| UNIQUE (The European Foundation for Quality in e-learning), BE | | | | |
| ECQ (The European Foundation for Quality in e-learning), BE | | | | |

The review indicates that concepts of quality can be applied at **Macro** (National/international), **Meso** (institutional) and **Micro** (individual practice) levels with the formal models reviewed addressing the issues at Macro and Meso levels. Less evidence has been found of performance standards at the Micro level, but no doubt this will exist within staff development and performance management criteria of those institutions that are engaged in quality assurance of their open, distance and online education programmes.

The report explores the concept of the development of maturity in quality assurance processes at both institutional and national levels through a progression from quality assurance applied to ensure compliance with fixed standards and norms to quality assurance as mechanism for improvement and enhancement and enhancement of provision. The distance education sector with its dependence on

Level of Analysis

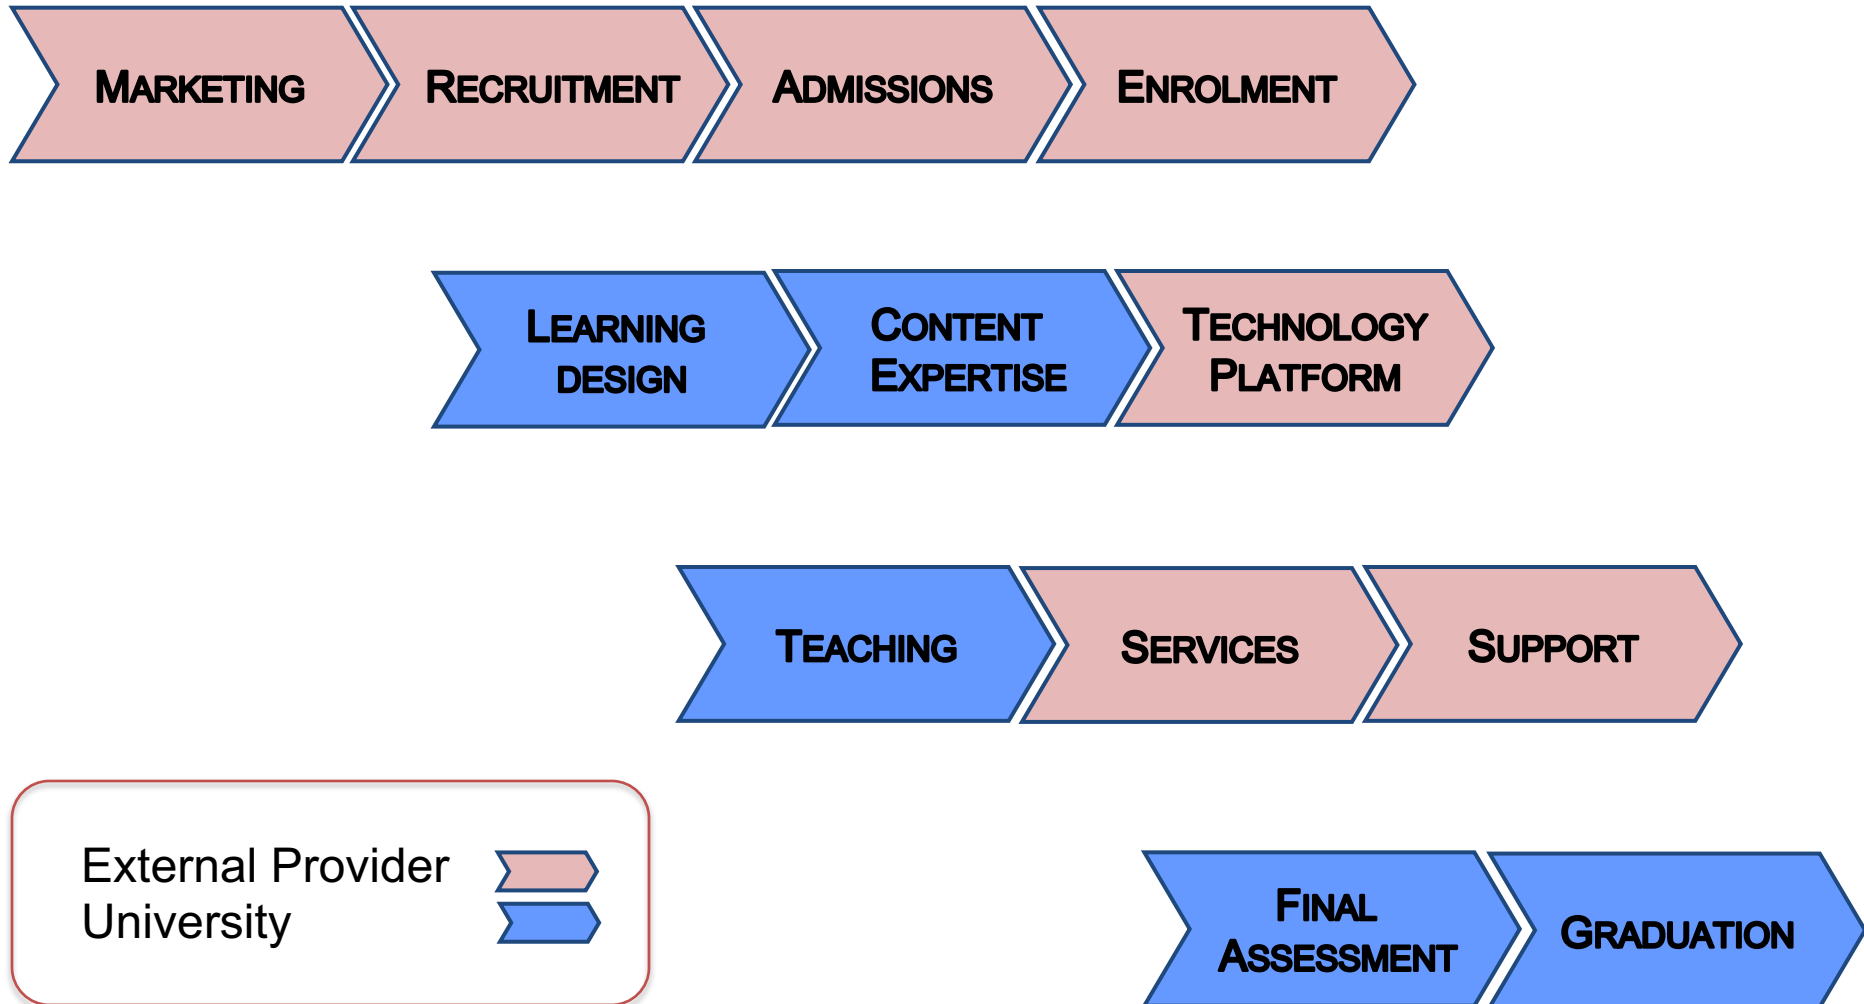

Unbundling & Disaggregation

What
does quality
assurance look
like when different
players do different
parts?

Unbundling & Disaggregation

Face-to-face setting the quality standard for online

Because we know what quality face-to-face looks like ...

Accreditation or Enhancement

What is the purpose of the Quality Assurance System?

Accreditation

A mandatory accreditation process that determines an institution's capacity to meet national standards

Enhancement

A review to evaluate current performance against broadly interpreted standards to benchmark, spot gaps, and improve institutional performance and culture

Core Characteristics of Quality Systems

- Multifacated: many measures of quality are used
- Dynamic: flexible and not constrained by tech du jour
- Mainstreamed: aim at trickle down improvements
- Representative: seek to address multiple stakeholders
- Multifunctional: 3 functions – quality culture, roadmap for future improvement, quality marker for external view

Recommendations 4 of 11

- R1. Mainstream e-learning quality into traditional institutional quality assurance.
- R3. Support professional development, in particular through documentation of best practice and exchange of information.
- R4. Communicate and promote general principles.
- R6. Address unbundling and the emergence of non-traditional educational providers.

Quality Assurance of Online Learning: Setting the scene – global and local

Why Are We here?

Australian Government
Tertiary Education Quality and Standards Agency

Quality Assurance of Online Learning

Tuesday 27 November, 9:00am – 3:30pm Deakin Downtown Level 12 Tower 2, 727 Collins Street, Docklands, Melbourne 3008

“In an increasingly complex and changing environment for transnational education provision all legitimate stakeholders have a responsibility to work collaboratively to protect students from degree mills and bogus accreditation and credential systems”

[ICDE p. 36]

“In several countries, there is evidence of Quality Assurance Agencies seeking to add guidance and informal standards relating to distance and online education to their existing systems of institutional quality assurance”

[ICDE p. 40]

Is This Why We Are Here?

The screenshot shows the QILT website (qilt.edu.au) in a web browser. The page has a green header with navigation links: About this site, For institutions, For students, Glossary, Feedback, Contact us, and social media icons. Below the header is a white banner with the QILT logo (a colorful geometric shape) and the text "QILT quality indicators for learning and teaching". To the right of the logo, there is a section titled "Help me get started" with a video player and a "View transcript" link. Below the banner is a navigation bar with links: Home, Study Areas, Institutions, My Shortlist (with a star icon and a count of 0), and a download icon. The main content area features a large image of a group of students walking outdoors. Overlaid on this image is a white search bar with the text "Find a study area or institution" and a "GO" button. Below the search bar, there is a section titled "Thinking about higher education institutions and study areas? Wish you could ask someone about their experience?" with two paragraphs of text. To the right of this text, there is a red circle highlighting a section titled "Where does this data come from?". This section contains a list of four items: Student Experience, Graduate Employment, Graduate Satisfaction, and Employer Satisfaction, each with a right-pointing arrow.

Find a study area or institution **GO**

Thinking about higher education institutions and study areas? Wish you could ask someone about their experience?

With QILT, you can do side by side comparisons of the quality of the higher education institutions and the study areas that you're interested in.

You can trust QILT results, because they are based on thousands of surveys completed by students across Australia. The results are up to date, because the surveys are completed every year.

Is This Why We Are Here?

Concerns about online attrition?

What is/are the Quality Assurance Issue(s)

What is Quality?

For Whom?

What is the “right” framework or approach?

1. We have a surfeit of frameworks and criteria to choose from
– with some excellent local examples – the adoption of which needs to be localised and contextualised.
2. There are a number of key considerations in this:
 - Macro – Meso – Micro
 - Unbundling and disaggregation
 - Historical hegemony of face-to-face mode of delivery
 - Questions of institutional accreditation or cultural change

*But our response to what we might do –
individually, institutionally, “sectorially”, collectively
– will depend on our response to the
“why are we here” question,
as much as to our reactions and responses to
the various frameworks and key considerations
I have outlined today.*

Thank you ...
